

Press Release

# Kepler ReCapture names new CEO

Kepler ReCapture appoints Paul Graham as new Chief Executive Officer, effective March 31, 2024.

---

FOR IMMEDIATE RELEASE

**04/25/2024** - Kepler ReCapture announces the promotion of their Chief Operations Officer, Paul Graham, to the role of CEO. The Board of Directors voted unanimously to approve this change in March of this year.

Former CEO Debi-Lee Wilkinson will be stepping down from the role to pursue her true passion for the physical sciences as the new Chief of Research and Development. Debi-Lee brings with her many years of dedication to improving humanity and our planet, and Kepler ReCapture is pleased to have her in this role. Paul Graham is excited to take on this new challenge, and intends to lead Kepler ReCapture into a new era of profitability.

Paul Graham assumes the role of CEO

## About the Company

*Kepler ReCapture is committed to preserving Earth in all its natural beauty. Their focus is on returning our planet's carbon dioxide saturation to pre-Industrial Revolution levels using state-of-the-art ocean-based platforms, and doing so profitably. They are a Top 100 finalist for the Musk Foundation-sponsored XPRIZE Carbon Removal project.*
